PROJECTS

Career Guidance System	<i>web development</i>
• In today's competitive world the selection of right career path or academics is a big challenge. Educational and Career Guidance is not as simple task as it sounds and it is a complicated thing, which depends upon many factors and aspects	
Customer churn analysis	<i>Machine learning</i>
• Studying customer churn analysis is essential for understanding not just how many customers are opting out of using your product/service, but also why and when they are churning.	
AI Studymate	<i>Currently working</i>
• Online lectures often lead to low student engagement, making it difficult for educators to track individual learning progress. Without real-time feedback, identifying struggling students becomes a challenge, as teachers cannot monitor each student's focus and understanding during a session.
